

ODT Global, LLC is a premier distributor, manufacturers' representative and integrator of product and material handling and labeling equipment, packaging machinery and pin perforation and fibrillation systems.

www.odtglobal.com

Our current partners include:

CTM Labeling Systems - Salem, OH

ODT Global is a dependable and flexible distributor of custom and standard pressure-sensitive label and print/apply label applicators. We offer complete custom labeling systems and support our equipment with installation and field service support offered through ODT Global. We also distribute SATO printing equipment and supplies!

QComp Technologies, Inc. - Appleton, WI

QComp is a robotics system integrator. We manufacture robotic pick, package and palletizing systems including case packing systems. QComp is a RIA Certified Robotics Integrator and partners with ABB, Fanuc and Kuka Robotics platforms.

Pack Air, Inc. - Neenah, WI

Pack Air, Inc. designs, manufactures and integrates custom conveyors and product handling devices. We specialize in consulting with our customers to understand their unique challenges and delivering customized solutions that improve the efficiency and capacity of their product lines.

MARQ Packaging Systems - Yakima, WA

MARQ is a top leader in supplying packaging machinery equipment solutions. We offer case erector bottom sealers, uniform or random sealers, trayformers and vibration settling/sealing equipment.

Lachenmeier - Glenview, IL

Lachenmeier manufacturers stretch hooding machines as an alternative to a stretch wrap machine for total pallet load protection and stability for transport. The need for a top sheet is eliminated, load stability is increased and total pallet enclosure is accomplished.

See reversed side for more offerings!

CONTINUED...Our current partners include:

Octopus - Masku, Finland

Manufactured by Haloila, the Octopus ring technology high speed pallet stretch wrapper is suitable for all pallet-loadable products in many branches of industry. Haloila has over 5000 installations worldwide. Features include double head with individual and independent force to load control and no touch, no tail film

Top Tier - Portland, OR

Top Tier manufactures affordable high quality palletizers from one layer per minute to five layers per minute and accommodates various load configurations without sacrificing safety. We have hundreds of installations worldwide.

American Film & Machinery - Corona, CA

AFM is a leading supplier of a full range of tamper evident banding and heat shrink label application machinery. We manufacture both radiant and steam shrink

Eastey Enterprises - Brooklyn Park, MN

Eastey is an industry leader in supplying shrink packaging machinery consisting of the value, performance and professional series of L-sealers and shrink tunnels ranging from semi- to fully-automatic equipment.

Equipment Technology Inc. - Peckville, PA

Equipment Technology, Inc. (ETI) is a second-generation family business that designs and builds automated machinery to assist manufacturers improve their production line and processes. ETI machines convey, stack, feed and/or pack a product along an assembly line with greater efficiency, speed and accuracy.

Luciano Packaging Technologies - Somerville, NJ

Luciano Packaging Technologies is a full-service systems integrator with excellent custom design and build machinery development capabilities. They offer custom high-speed packaging systems including, but not limited to vision inspection/verification, package coding, part assembly and testing, and Key-Pak vertical form/fill/seal machines.

Burckhardt of Switzerland - Basel, Switzerland

Burckhardt manufactures high quality pin perforating rings, tools and hot and cold pin fed perforations systems for various substrates for breathability and moisture control. We are also experts in offering fibrillating pin bars and rings for fibrillated films, tapes and yarns.
